

GIRARD SUDRON

PARIS 1894

130 YEARS | 1894 | 2024/25

AT THE ORIGIN OF LIGHT.

ACCESSORIES

GIRARD SUDRON

PARIS 1894

And the light was designed by **GIRARD SUDRON**

*Maison Girard Sudron has been a guest in interiors since 1894.
The brand has spanned the years, the eras, always remaining as innovative as
in its beginnings and reinventing itself to stay in tune with the times.
Its pillars? **Quality, service and passion for light***

130 YEARS OF MODERNITY

Impossible to miss this historic mark. Specialist in high-end and original premium lighting solutions, **Girard Sudron** has always been ahead of its time by initiating trends and integrating the best technologies into products with careful aesthetics. At the beginning of electric lighting, it was the brand that equipped candle chandeliers, by developing a sheath system combined with a luminous candle which made it possible to use this new mode of lighting while retaining a traditional style. The brand then continues to write its history by already establishing itself in the creative sector.

The post-war period saw the revolution of **Girard Sudron** using a new glass blowing technique with a “*slightly curved tip*” which had become iconic. The models still remain relevant today. You won't be the first to succumb!

Girard Sudron lamps light prestigious places such as the Élysée, the Lyon City Hall, the Château de Versailles, the Domaine National de Chambord, the Opéra Garnier, major palaces around the world and luxury businesses.....

Our nerve is our seal

As prestigious as the sapphire present in our LEDs, we amplify the elegance right down to the base of our bulbs, making them luminous both off and on. Anchored in our DNA for so many years, from the Grand Siècle flame to the Edison via our giant 600mm diameter bulb, all our bulbs have a unique golden base. Color of the sun synonymous with signature, our aesthetic does not stop there. From our clear, amber or smokey finishes we pay particular attention to all our bulbs in their entirety.

Why choose LED?

In recent years, sustainable development has become one of the priorities of our contemporary society. This is why we make every effort to produce while protecting nature as well as your consumption. By using our LED lighting, you can significantly reduce your ecological footprint.

Also chosen by the general public for several years, its purchase is more ecological since its lifespan is tenfold compared to an eco-halogen bulb soon to be banned in the European market. Less energy-consuming than an incandescent bulb, it nevertheless has a light intensity of up to 100 lumens per watt.

A brief overview of the advantages of LED

- Bulbs without mercury or polluting gases.
- A lifespan far superior to other light sources.
- Lighting at maximum level from the moment it is switched on and not gradually.
- Less energy-consuming light sources.
- Little need for maintenance due to its longevity.
- No heat release.

PARIS 1894

Essential to your decoration

Whether you are chandelier restorers wanting to preserve all the quality and choice of materials from yesteryear, or creative with a boundless imagination wanting to adapt to the new consumption of future generations, you will find in this chapter all the lighting accessories you need to re-bring your ideas to life..

From vintage, industrial or design style to raw materials like concrete or noble materials like brass, we offer you a wide choice of items with subtle and elegant finishes to compose all kinds of lighting or restore old unique pieces dear to the eyes of their owners.

In this chapter you will find everything you need to make your light the key element of your decor. As vital as the air we breathe, *customize your suspensions, transform your old kerosene lamps or simply play with recycled objects.*
